Experience

CloudThat

Research Associate

Ahmedabad, Gujarat

July 2025 – Present

- Assisting in the setup and management of AWS infrastructure as part of a consulting team.
- Learning and applying AWS best practices for cloud security, scalability, and automation.
- Supporting internal projects and contributing to basic cloud operations, monitoring.

CloudThat

Research Intern

Ahmedabad, Gujarat

January 2025 – July 2025

- Completed a 6-month internship focused on AWS services, cloud infrastructure, and system monitoring.
- Built a centralized security monitoring tool using Python, FastAPI, and AWS services such as EC2, S3, DynamoDB, Lambda, and Bedrock.

Education

Nirma University, Ahmedabad

B.Tech in Electronics and Communication Engineering — Minor in Computer Science

2021 – 2025

CGPA: 8.16 / 10

GD Goenka International School, Surat

Senior Secondary Education (CBSE)

2019 – 2021

Percentage: 95.4%

Skills

Programming: C/C++, Python, SQL, Java (OOP), Data Structures and Algorithms

Web Development: JavaScript, MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS), FastAPI

Cloud & DevOps: AWS (EC2, Lambda, S3, DynamoDB, IAM, VPC, CloudTrail), Boto3, Git, Linux

Certifications

AWS Certified Solutions Architect Associate (SAA)

[View on Credly](#)

Microsoft Certified: Azure Administrator Associate (AZ-104)

[View Credential](#)

HashiCorp Certified: Terraform Associate (004)

[View on Credly](#)

AWS Certified Developer – Associate

[View on Credly](#)

AWS Certified CloudOps Engineer – Associate

Projects

SecOps360 | React, FastAPI, Python, Boto3, Websocket, Nginx, EC2, S3, IAM, Amazon Bedrock

- Designed and deployed a centralized AWS security monitoring platform using React (frontend), FastAPI (backend), and Nginx as a reverse proxy, hosted on EC2.
- Developed REST APIs and integrated WebSocket to provide real-time security scan updates across multiple AWS accounts.
- Automated 50+ security checks across IAM, EC2, S3, RDS using Python and Boto3, aligned with AWS best practices.
- Built an anomaly detection system using Isolation Forest, One-Class SVM, and Autoencoder on VPC Flow Logs and CloudTrail data.
- Utilized Amazon Bedrock to generate human-readable summaries of potential threats and stored in S3 to view last scanned data.
- Integrated a chatbot assistant to answer AWS security queries, improving usability of insights.
- Implemented compliance scanning aligned with industry standards including CIS Benchmarks, AWS Well-Architected Framework (WAFR), and ISO 42001 for AWS infrastructure.
